Pemrograman Web 2

Sirojul Munir | rojulman@nurulfikri.ac.id | @rojulman

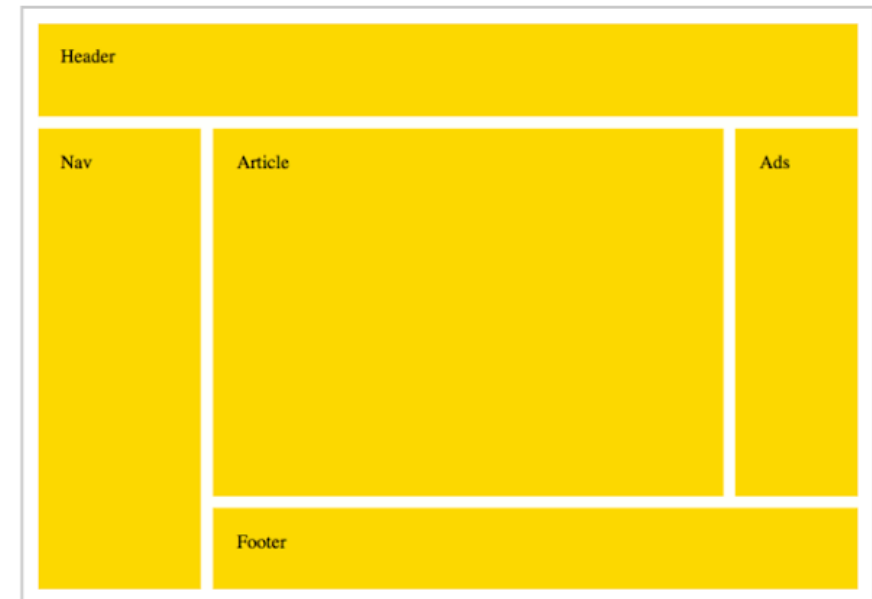

7. Implementasi Template Web

Template Web

Template Web bagian terpenting dalam aplikasi web, dengan template web implementasi aplikasi menggunakan bahasa pemrograman Server seperti PHP akan dimudahkan.

Grid Layout 1

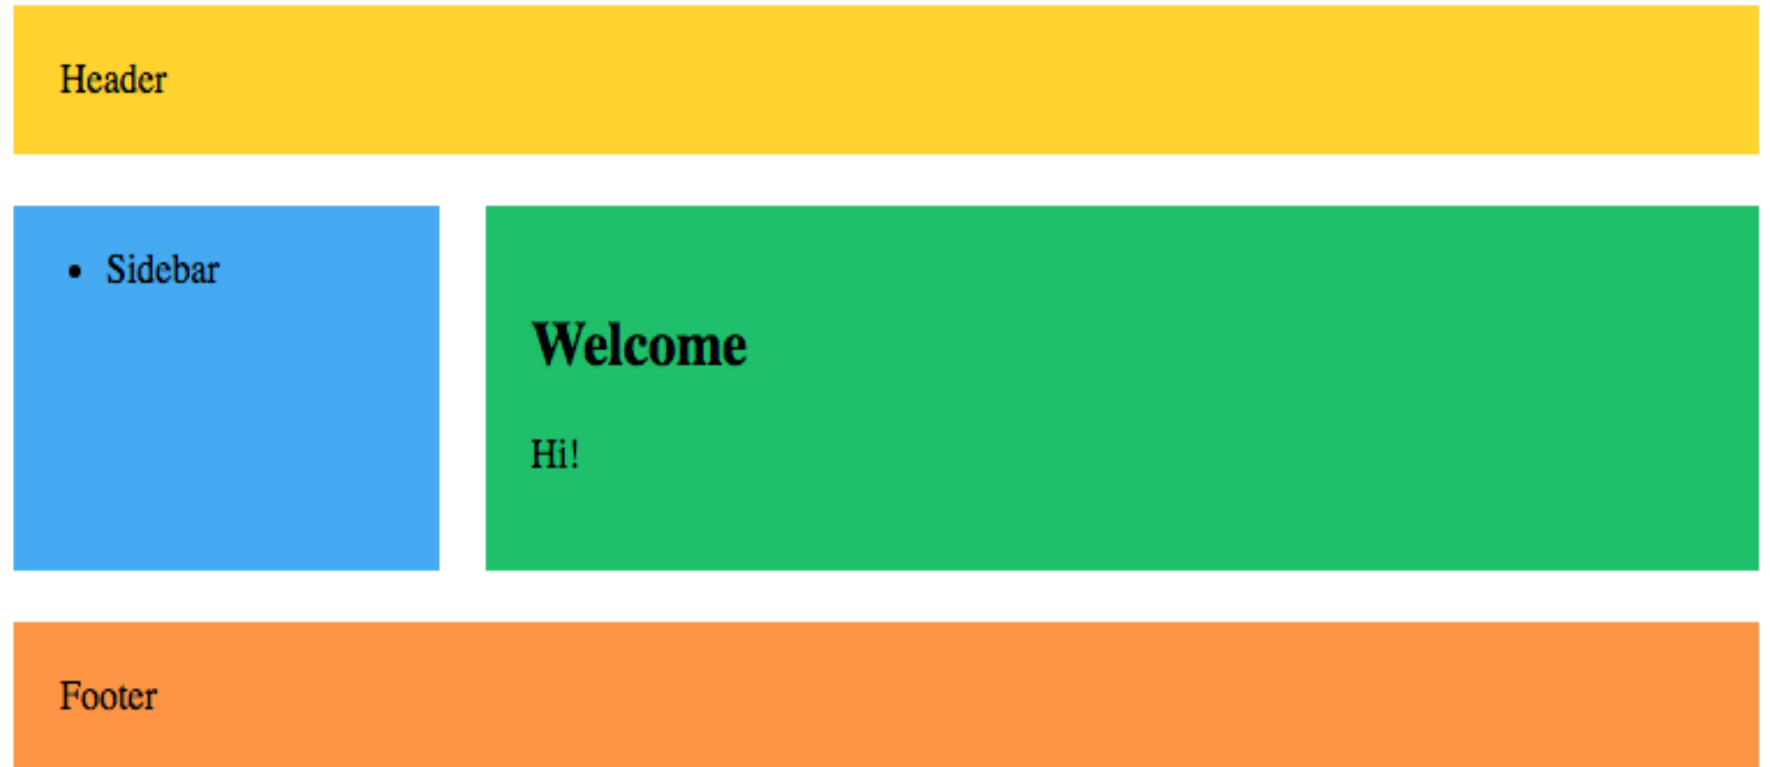

Template Web

- Saat membangun aplikasi web, template web dibutuhkan agar tampilan web memiliki UI/UX yang baik
- Pada aplikasi web, bagian yang sering berubah secara dinamis adalah bagian konten (main)
- Bagian header yang berisi menu dan footer yang berisi informasi tambahan web tidak banyak berubah
- Terdapat fungsi PHP yang dapat mendukung desain web dinamis: `include()` dan `require()`

Template Web

- Salah satu Teknik implementasi template web adalah dengan memisah file menjadi beberapa bagian:
 1. Header
 2. Main
 3. Footer
- Kemudian file disatukan dengan elemen file Main yang dinamis

include – require : function

- include / include_once : menyertakan file untuk ditampilkan
- require / require_once : menyertakan file library (function / class)

Web template : template.html

```
<!DOCTYPE html>
<html>
  <head>
    <meta charset="utf-8">
    <title>SAS-STTNF</title>
  </head>
  <body>
    <header role="banner">
      <h2>Student Activity Score - STTNF</h2><hr/>
    </header>
```

← atas.php

```
    <footer>
      <p>Created by Pusinfo NF &copy;2017</a></p>
    </footer>
  </body>
</html>
```

← bawah.php

Web template : include_once 'nama_file' ;

```
<?php
    include_once 'atas.php' ;
?>
    <h1> Welcome Home </h1>

<?php
    include_once 'bawah.php' ;
?>
```

← home.php

require / require_once

```
function jumlah($a , $b)
{
    return $a + $b ;
}
```

← myfungsi.php

```
require_once 'myfungsi.php';
echo '8 + 7 = ' . jumlah(8,7); // 8 + 7 = 15

$x = 20; $y=25;
$z = jumlah($x,$y);

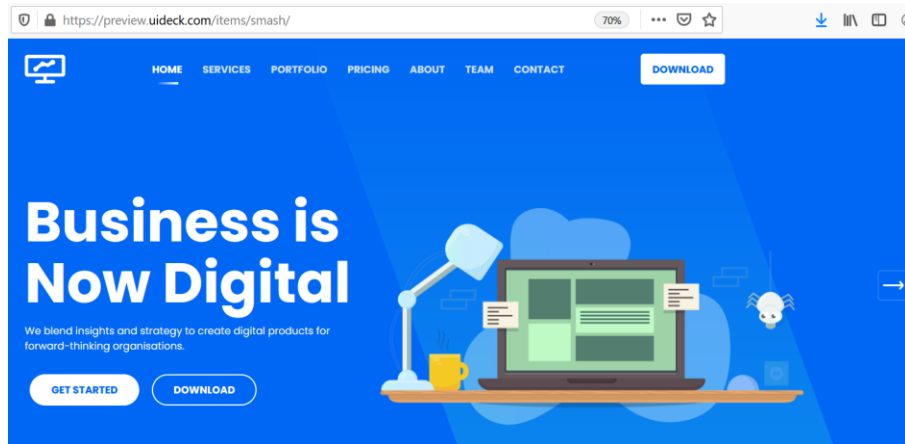

echo "$x + $y = $z "; // 20 + 25 = 45
```

← usefungsi.php

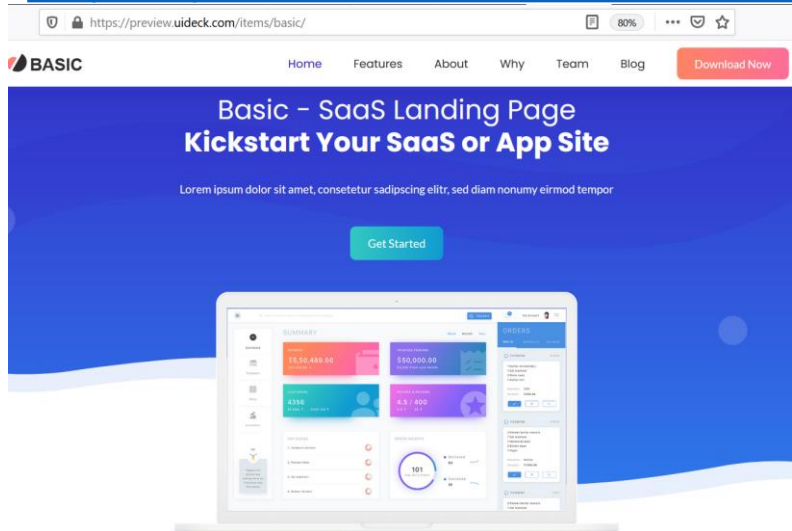

Template web landing page

- Beberapa website di internet menyediakan template web landing page yang siap pakai, tersedia free dan berbayar.
 - ✓ <https://onpagelove.com/templates/free-templates>
 - ✓ <https://templatemo.com/tag/landing-page>
 - ✓ <https://startbootstrap.com/themes/landing-pages>
 - ✓ <https://dev.to/davidepacilio/40-free-html-landing-page-templates-3gfp>

Template web aplikasi

- Berikut website di internet yang menyediakan template aplikasi berbasis Responsive Web Design

Adminlte: adminlte.io

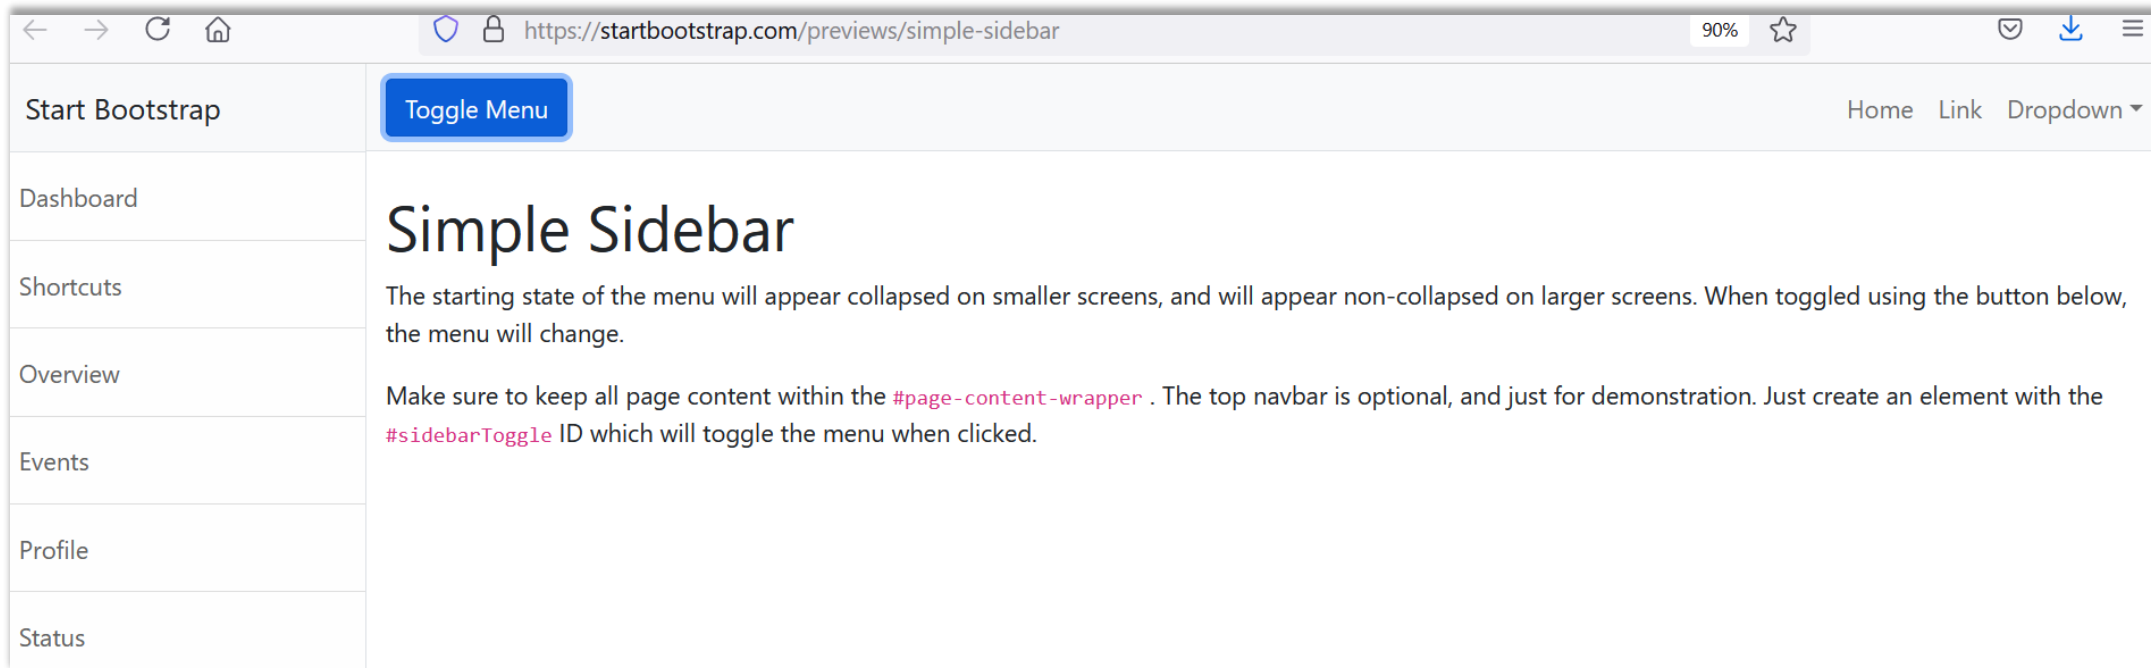

Sb-admin-2

<https://startbootstrap.com/theme/sb-admin-2>

Simple Sidebar Template

- <https://startbootstrap.com/template/simple-sidebar>
- Support Responsive Web Design
- Menggunakan bootstrap framework

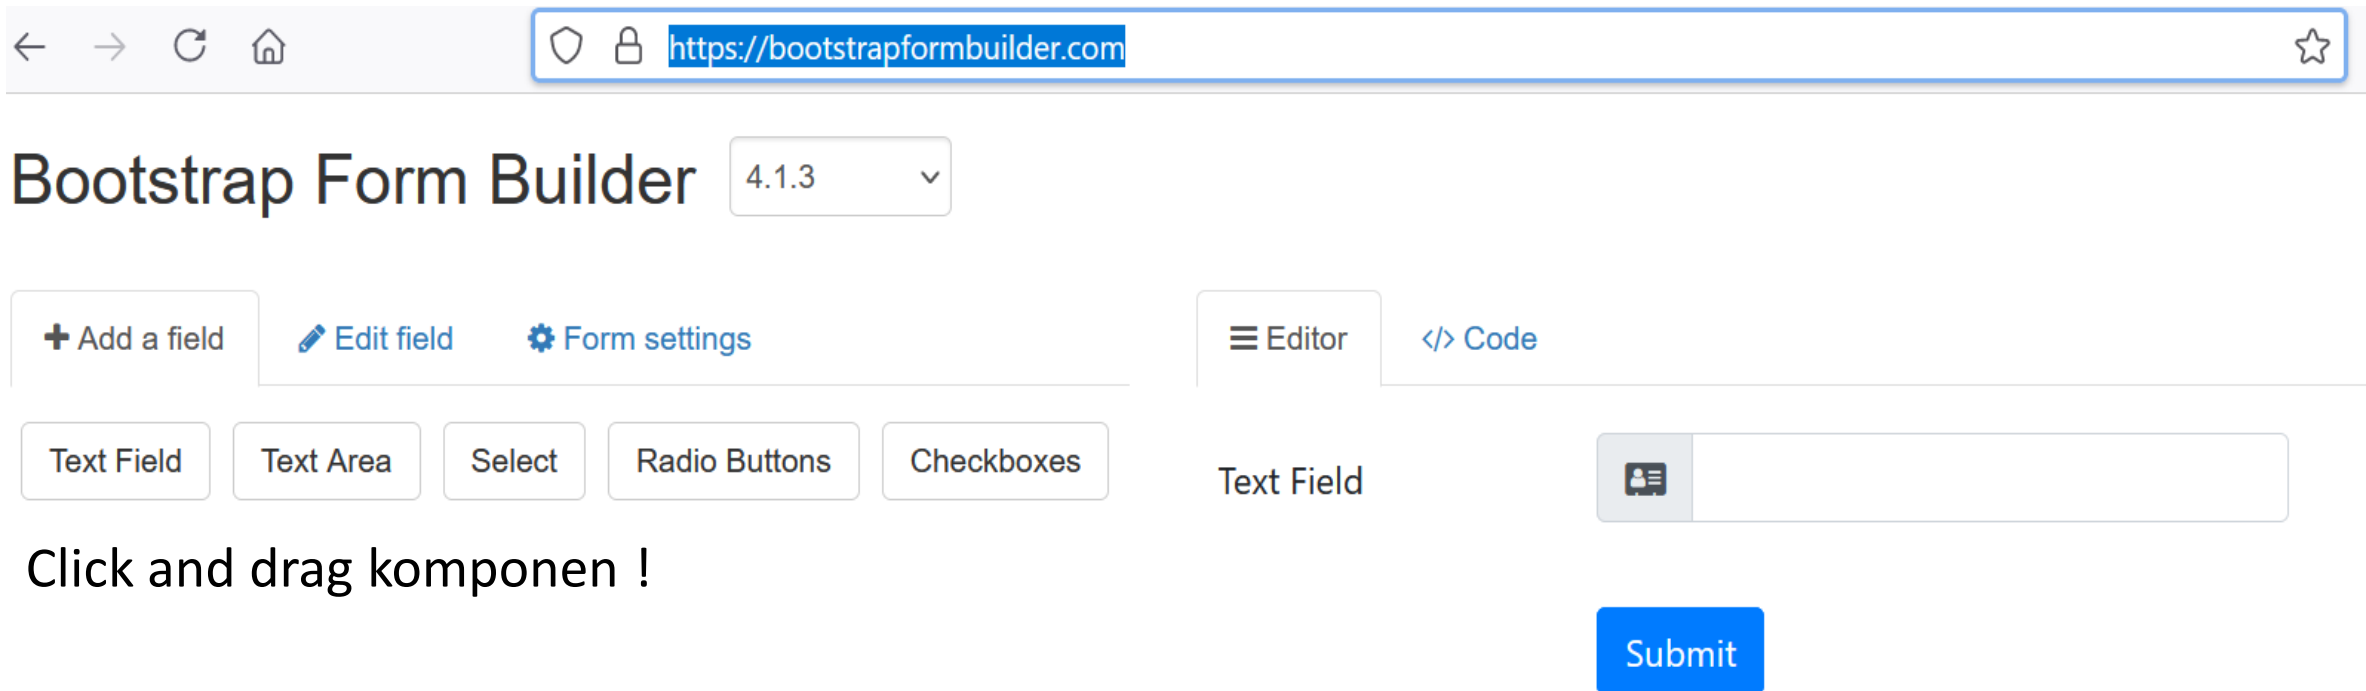

Online Form Builder - bootstrap

- Pada aplikasi web biasanya sebagian besar adalah berupa bisnis proses yang menggunakan Form
- Seperti form: login, registrasi, shopping cart, upload file dll
- Di Internet tersedia tools untuk membuat Form menggunakan library bootstrap
- <https://bootstrapformbuilder.com/>

Online Form Builder - bootstrap

- <https://bootstrapformbuilder.com/>

The screenshot shows the Bootstrap Form Builder web application. At the top, there's a browser address bar with the URL <https://bootstrapformbuilder.com/>. Below the address bar, the title "Bootstrap Form Builder" is displayed next to a version dropdown menu set to "4.1.3".

The main interface is divided into two sections. The left section contains a toolbar with three buttons: "+ Add a field", "Edit field" (with a pencil icon), and "Form settings" (with a gear icon). Below these are five buttons for different form components: "Text Field", "Text Area", "Select", "Radio Buttons", and "Checkboxes".

The right section shows the "Editor" tab selected, with a "Code" tab also visible. The editor area displays a "Text Field" component with a user icon on the left and a text input field. Below the input field is a blue "Submit" button.

Below the component buttons on the left, the text "Click and drag komponen !" is displayed.

Online Form Builder - bootstrap

- <https://bootstrapformbuilder.com/>
- Desain form dengan cepat

The screenshot shows the Bootstrap Form Builder web application. The browser address bar displays <https://bootstrapformbuilder.com/>. The page title is "Bootstrap Form Builder" with a version dropdown set to "4.1.3".

On the left, there are three tabs: "+ Add a field", "Edit field", and "Form settings". The "Edit field" tab is active, showing a configuration panel for a form field. The configuration options include:

- Title:** A text input field containing "Email".
- Unique id and name:** A text input field containing "email".
- Placeholder:** An empty text input field.
- Prepend:** A dropdown menu set to "Icon" and a text input field containing "fa-anchor" with an icon button.
- Append:** A dropdown menu set to "No".
- Help text (instructions):** An empty text input field.

On the right, the "Editor" tab is active, showing a live preview of the form. The form contains the following fields:

- Nama Lengkap:** A text input field with an icon button.
- Email:** A text input field with an icon button and a set of control icons (hand, down arrow, up arrow, and close).
- Pekerjaan:** A dropdown menu with "ASN" selected.
- Pembayaran:** Three radio buttons labeled "COD", "Transfer", and "Virtual Money".
- Submit:** A blue button labeled "Submit".

Online Form Builder - bootstrap

Editor Code Options

```
<link rel="stylesheet" href="https://stackpath.bootstrapcdn.com/bootstrap/4.1.3/css/bootstrap.min.css">
<link rel="stylesheet" href="https://maxcdn.bootstrapcdn.com/font-awesome/4.7.0/css/font-awesome.min.css">

<form>
  <div class="form-group row">
    <label for="nama" class="col-4 col-form-label">Nama Lengkap</label>
    <div class="col-8">
      <div class="input-group">
        <div class="input-group-prepend">
          <div class="input-group-text">
            <i class="fa fa-address-card"></i>
          </div>
        </div>
        <input id="nama" name="nama" type="text" class="form-control">
      </div>
    </div>
  </div>
  <div class="form-group row">
    <label for="email" class="col-4 col-form-label">Email</label>
```

Online bootstrap template web

- Di Internet juga tersedia template web yang siap pakai, sesuai dengan kebutuhan pengembangan yang telah mendukung bootstrap.
- Seperti: Halaman login, Halaman profile user, Halaman belanja, Halaman daftar berupa table
- Kode program dapat diintegrasikan sesuai dengan versi bootstrap yang digunakan
